1. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

2. The reply filed on July 16, 2002 is not fully responsive to the prior Office action because of the following : **Please see the CRF Problem Report sheet, attached, that indicates that the CRF received was damaged, and provides guidance as how to send the CRF to the USPTO in order to avoid further problems.** Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. **EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).**

Applicant is requested to return a copy of the attached Notice to Comply with the reply.

  
**LORRAINE SPECTOR

3. It is also brought to the attention of the Applicants that the instant specification does not comply with 37 C.F.R. § 1.821 (d) which requires a reference to a particular sequence identifier (SEQ ID NO:) be made in the specification and claims wherever a reference is made to that sequence. See M. P. E. P. 2422.04

Where sequence information is provided in the specification, it should be referred to by a SEQ ID number. See 37 CFR 1.821 (d): Where the description or claims of a patent application discuss a sequence listing that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the assigned identifier, in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application.
